

Online
Oshima Brothers

It took a heavy toll this time around
You magnetized my phone so I can't put you down
This constant touch and go ain't good for me
But when I'm looking now there's no one else I see

Take that picture and put it online
I know you know that you could have this heart of mine
And when I'm with you we do it alright
I know you know that you could have this heart

I'll shake my head to clear these jealous eyes
It's hard to see you here every day and night
I wish that I could go back in time
So I could get to know you offline

Take that picture and put it online
I know you know that you could have this heart of mine
And when I'm with you we do it alright
I know you know that you could have this heart

I wanna see you when you ain't online
I wanna tell you you're on my mind
I wanna see you when you ain't online
I wanna tell you you're on my

Take that picture and put it online
I know you know that you could have this heart of mine
And when I'm with you we do it alright
I know you know that you could have this heart
