

## **The Afterglow**

### **Oshima Brothers**

We were drinking in the cabin  
Middle of the summer  
And you told me we'd be friends forevermore  
We were running through the wildwood  
And oh how I remember  
All the times you'd laugh and finish my sentences

We stayed up to the morning light  
Talking 'bout the girls we like  
You and me foolishly wanna be getting old  
When we stayed up to the morning light  
Talking 'bout the girls we like  
These days we're always living in the afterglow  
[Living in the afterglow]

We been talking in the evening  
I can tell you're slowing down  
Got life you wanna savor for a while  
Right before we hang up  
Told me that you missed the sound  
Of the songs I made up under those summer skies

We stayed up to the morning light  
Talking 'bout the girls we like  
You and me foolishly wanna be getting old  
When we stayed up to the morning light  
Talking 'bout the girls we like  
These days we're always living in the afterglow  
[Living in the afterglow]

We were just kids on the day we met  
We were thirteen playing old cassettes  
Those gold days I'll remember always always  
We were sixteen learning how to drive  
We were twenty two made it out of school alive  
Those gold days I'll remember always

[Final Chorus]
